

# Definition of Done

## **1. Feature Implementation:**

- Feature functionality is implemented and meets all acceptance criteria.
- Implementation accurately reflects feature/user story.

## **2. Code Review:**

- Code is written, peer-reviewed by at least one team member, and then merged into the main branch

## **3. Bug Fixes:**

- All bugs that are reproducible should be clearly documented, and brought up in the next standup meeting.

## **4. Deployment:**

- The feature is automatically deployed to the staging environment when pushed to the main branch

## **5. Documentation:**

- All relevant documentation for the feature is updated.
